

Streamdata.io Partners with API Evangelist

DECEMBER, 2017

STAMFORD, CT – Streamdata.io announced today it is starting a partnership with Kin Lane.

Kin Lane is famous in the API world for his blog APIEvangelist.com that has become a reference for developers around the world, his work with the Obama administration or with the Electronic Frontier Foundation.

“We’re happy and proud to have Kin Lane partnering with us at Streamdata.io. With his expertise of the API world and his unique approach of both the technical and the business side of APIs, he is going to help us explore the potential of our solution with new industries.” declared Eric Horesnyi, C.E.O. of Streamdata.io.

About Streamdata.io:

Streamdata.io is a B2B software vendor making real-time data accessible to all by operating a proxy turning any APIs into an event-driven streaming API.

With use-cases ranging from monetizing API, enhancing UX with animated interfaces, feeding machine-learning systems, distributing information more efficiently on mobiles to optimizing API costs, Streamdata.io solution offers multiple level of benefits while being extremely scalable and secure.
